

Milestone 3 P1 Items

- Logo all the way to the left
- Sign in / Sign up all the way to the right
- change favicons in navbar to text
- Make it so search searches ONLY by name, NOT by username
- Make it so the tutor cards open the message box to the right in desktop view rather than underneath (they should still open underneath in mobile view)
- Move reset and send buttons on the tutor post form inside the same div box as the form content
- switch the reset and send buttons so reset is on the left and send is on the right
- Make the reset button a cancel button that also redirects back to the homepage
- Make the subjects boxes pull from a table in the database with the tutor posts table having the subjects (or the subject ID?) as a foreign key
